

Great for Our Planet, Better for Your Business

Agilent Trade-In and Buyback Program

Unlock the value of your older or unused instruments

Does your lab have sustainability goals in place? 85% of labs already do. In fact, global trends suggest that companies that don't act sustainably face obsolescence in the future.

You can lower your environmental impact—and optimize your workflow—with the Agilent Trade-In and Buyback Program. In 2021 alone, this program kept more than 800 systems out of landfills. For instruments not eligible for the program, Agilent will handle the disposition of your used instruments in an Earth-friendly way.

A sustainable way to acquire the latest technologies

Agilent Trade-In and Buyback Program can also help you obtain the instrumentation and software you need for long-term business success. How? By giving you cash or credit for your older chromatography, mass spectrometry, and spectroscopy systems. Eligible instruments include:

- HPLC and LC/MS systems
- GC and GC/MS systems
- ICP-OES and ICP-MS systems
- Cell analysis systems
- Other select Agilent platforms

To check the eligibility of your older or unused instruments, visit www.agilent.com/chem/unlock-the-value

Agilent
CrossLab
From Insight to Outcome

Let Agilent do all the work

Packaging

De-installation

Collection

Earth-friendly disposal

No hidden costs, customs tax, or shipping charges

Not yet ready to trade-in or sell?

Optimize instrument use and manage your complete fleet with Agilent CrossLab services.

Focus on your science and reduce your regulatory risk

CrossLab services help your lab stay audit ready, and give you confidence that your equipment and processes conform.

Planning a move?

Choosing Agilent relocation services gives you a single point of contact, and ensures that your move will be “science ready.”

Sharpen your competitive edge

Overcome application problems and reduce the time it takes to develop and implement new methods.

Get answers. Share insights. Build connections.

The Agilent Community is the best place to seek your colleagues' help, get questions answered, and find in-depth content relevant to your analysis.

Partnering for sustainability and business success

The Agilent Instrument Trade-in and Buyback Program is one of many ways Agilent provides sustainability and recycling options to customers with green initiatives.

We believe that efficiency, productivity, and sustainability are interlinked. Working toward sustainability is an integral part of how we conduct business and respond to our customers' challenges. In addition, Agilent has been ranked Number One Most Sustainable Company by Barron's, based on factors such as water use, waste generation, and greenhouse-gas emissions.

Together, we can help your lab achieve its sustainability goals—while increasing output, maintaining accuracy, and staying competitive.
