

Magic™ Therapeutic Antibody Discovery Platform

Creative Biolabs has developed a novel [Magic™ Therapeutic Antibody Discovery Platform \(MTADP\)](#) for high-throughput antibody identification which integrates phage display, novel single DNA isolation technology and next generation sequencing (NGS) technology.

MTADP Technology

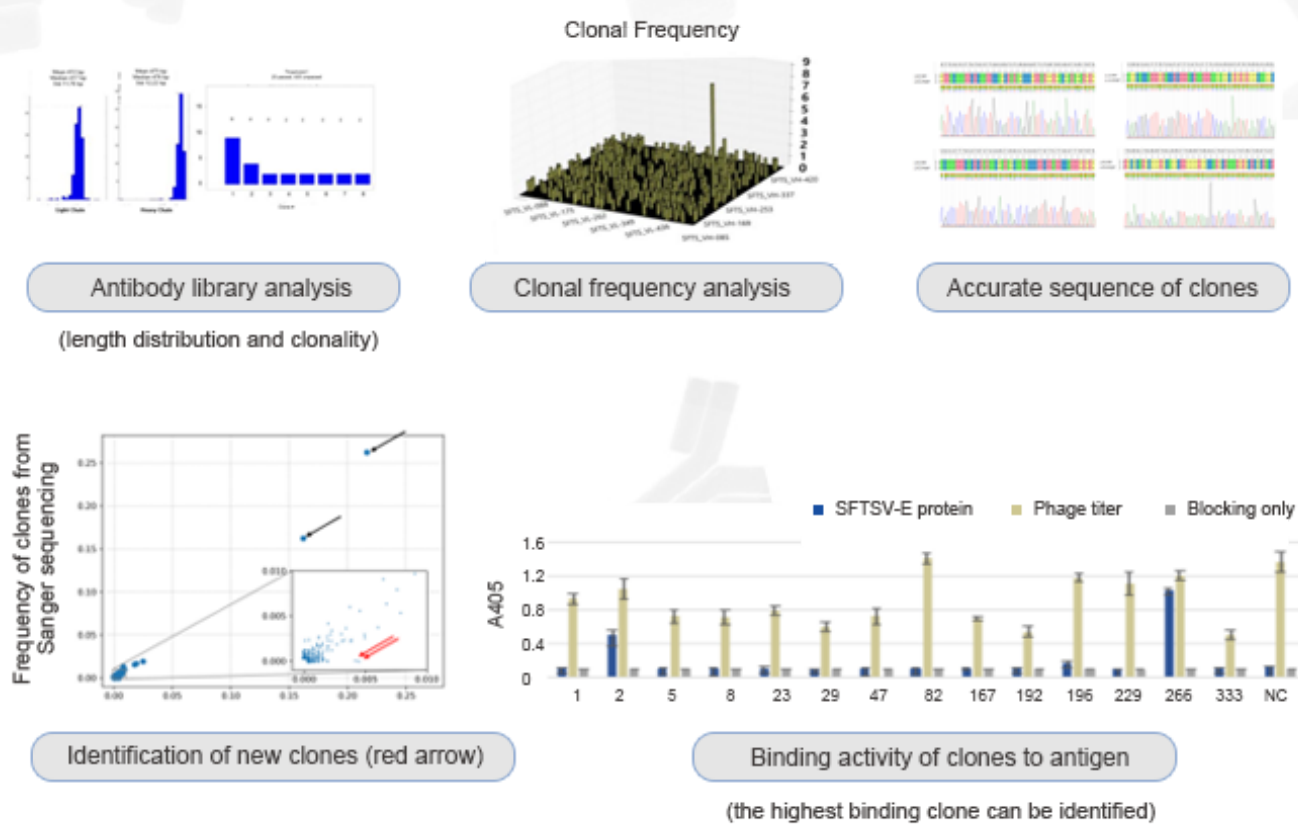

Advantages of Therapeutic Antibody Discovery at Creative Biolabs

- Full Length VH-VL linkage analysis (Read length>1,000 bp)
- Large numbers of candidate clones with high affinity and specificity
- Novel single DNA identification
- Multiple clonal ID tag
- Accurate NGS-based antibody sequencing
- Low cost and time-saving
- Retrieval of the physical DNA for further characterization

Phage Display Antibody Library Analysis Sample Report (partial)
